

## Lab monitoring

The following laboratory parameters may need to be monitored at regular intervals

Labs	Baseline	24 hours	48 hours	72 hours
S. Electrolytes		✓		✓
Blood urea		✓		✓
S. Creatinine		✓		✓
Blood sugar				
PT/PTT	✓	✓	✓	✓
Hb, TC, DC, Plat	✓		✓	✓
SGOT/SGPT	✓			
ECG	When clinically indicated (drop in heart rate <80/minute)			

Check blood gases as per the asphyxia protocol.

Stop cooling prior to 72 hours if there is

1. Persistent hypoxemia in 100% oxygen.
2. Life threatening coagulopathy.
3. Arrhythmia requiring medical treatment (not sinus bradycardia).
4. Decision on withdrawal of care- signs of irreversible brain death.
